8081233871 • anas.ahamad955@gmail.com • linkedin.com/in/anas-um • github.com/Anas-github-acc

EDUCATION

B.Tech, Information Technology

IIIT Vadodara, Gujarat, India

Expected Graduation: Aug 2027

7.46 / 10.0 GPA

Coursework: Data Structures, Algorithms, Operating Systems, Object-Oriented design, Backend Systems, Machine Learning

PROFESSIONAL EXPERIENCE

Aarogya Kaya | SDE Intern | Remote

July 2025 - Jan 2026

- Architected a Go backend using CQRS, PostgreSQL, and Supabase RPCs, integrating external services and authenticated APIs across multiple application modules.
- Designed a multi-tiered backend architecture using in-memory cache, Redis, and database, reducing average read latency from **420ms to 38ms (91%)** and maintaining **p95 latency below 250ms**.
- Translated evolving business requirements into backend designs across 15+ modules, contributing through the **full SDLC**.
- Engineered fault-tolerant asynchronous pipelines with retries and idempotent processing for a production system serving **1,000+ users daily**, maintaining 99.9% data consistency.

Open Source Contributor | Remote

July 2025 - Present

- **Contributed to Next.js (Vercel)** by migrating the patch-next utility from CommonJS to TypeScript ESM, eliminating repeated dependency reinstalls and reducing contributor setup overhead.
- Contributed 22 merged Pull Requests and opened 12 Issues across open-source projects, incorporating maintainer feedback to fix bugs, implement features, and improve developer tooling.

PROJECTS

a3.store | DynamoDB-Inspired Distributed Key-Value Store | Python, AWS, EKS, gRPC, Terraform

Live | GitHub

- Developed a leaderless **distributed key-value store** with JWT authentication and RBAC, implementing replication, failure detection, gossip membership, and anti-entropy repair across a 3-node cluster.
- Deployed on AWS EKS using Kubernetes StatefulSets and persistent volumes, enabling **rolling upgrades, pod recovery** and **self-healing behavior**.

Second Brain | Agentic Career Path Simulator | Python, LLMs, OpenRouter, Redis, PostgreSQL

Live | GitHub

- Built a multi-stage Generative AI and prompt-engineering pipeline that transforms natural-language decisions into structured scenario graphs containing paths, risks, trade-offs, and possible outcomes.
- Built asynchronous LLM orchestration with model routing, fallbacks, structured outputs, and dynamic what-if expansion.

IntoxAI - Python, LangChain, FastAPI, RAG

Live | GitHub

- Built an end-to-end RAG pipeline using LangChain, token-aware document chunking, HuggingFace embeddings, and Chroma vector search for context-grounded question answering.
- Implemented prompt-engineered RAG with top-k semantic retrieval and OpenAI LLMs for context-grounded responses.

TECHNICAL SKILLS

Languages: Go, Python, C/C++, Javascript, SQL, Rust

Backend & System: FastAPI, Node.js, gRPC, REST APIs, Redis, JWT, OAuth, RBAC, System Design

Cloud & Infrastructure: AWS, Lambda, DynamoDB, S3, EKS, Kubernetes, Docker, Terraform, IAM, EC2, VPC, CI/CD

AI & LLMs: LangChain, RAG, AWS Bedrock, GCP Document AI, HuggingFace, OpenRouter, Prompt Engineering, PyTorch

Automation & Testing: Playwright, Selenium, BrowserBase, BeautifulSoup

ACHIEVEMENT

- Ranked **365th** among **15,804** participants in CodeChef **START192D**.
- Ranked **3,026th** among **17,000+** participants in Codeforces Round 1110 (Div. 1 + Div. 2)

LEADERSHIP & ACTIVITIES

- Organized an intra-college hackathon and mentored **25+ teams** as a **Technical Committee Core Member**.
- Led recruitment, mentorship, and event initiatives for **100+ students** as **Joint Secretary of DOT Club**.
