EDUCATION

B.Tech in Information Technology

August 2023 - May 2027

IIIT Vadodara, Gujarat, India

Coursework: Data Structures & Algorithms, Operating Systems, Object-Oriented Design, Backend Systems, Distributed Systems

EXPERIENCE

Aarogya Kaya | Remote | Software Engineer Intern

July 2025 - January 2026

- Architected backend services using CQRS, PostgreSQL, and Supabase RPCs, securing **15 RPC functions** with **JWT/RBAC**, **secure API access**, and **least-privilege security practices** across 2 external services and 3 APIs.
- Optimized backend read paths with in-memory caching, Redis, and database access patterns, reducing average latency from **420ms to 38ms** while maintaining **p95 latency below 250ms**.
- Engineered **fault-tolerant asynchronous pipelines** with retries and idempotent processing for a production service serving **1,000+ users daily**, maintaining high data consistency.
- **Built CI/CD pipelines** for backend and web services, automating **unit tests**, **Playwright end-to-end tests**, **linting**, **build validation**, and **deployment** on pull requests and merges.

Open Source | Remote | Software Contributor

July 2025 - May 2026

- Migrated the **Next.js (Vercel) patch-next utility** from CommonJS to TypeScript ESM, saving **15–30 seconds** per local reinstall during development and testing.
- Contributed **30+ merged PRs** through maintainer **code reviews**, **design discussions**, and **iterative feedback**, while building **CI workflows** for **automated testing and validation** across open-source projects.

PROJECTS

Cloudx.syn – Windows Cloud File Sync Client | C#, .NET 9

[Github](#)

- Implemented a **C#/.NET 9 Windows application** using FileSystemWatcher for real-time synchronization, detecting **4 filesystem events** create, modify, rename, and delete and propagating changes to cloud storage.
- Integrated **Box and Firebase** through OAuth-authenticated cloud APIs and queue-based processing to securely upload files and maintain synchronized project metadata.
- Instrumented **6 core synchronization components** with logging for file events, cloud API interactions, errors, and performance, enabling **service-health monitoring and production troubleshooting**.

A3.store – Distributed Key-Value Database | Python, AWS, EKS, gRPC, Terraform

[Live](#) | [Github](#)

- Developed a **leaderless key-value service** with gRPC replication, failure detection, gossip membership, and anti-entropy repair across a **3-node cluster**.
- **Implemented pytest unit and failure-scenario tests** for storage, replication, and consistency components using **dependency injection** to isolate dependencies and improve maintainability.
- Operated and monitored a **3-node cluster** on AWS EKS using readiness/liveness probes and **Prometheus/Grafana**, validating self-healing, rolling upgrades, and disaster recovery with **sub-60s recovery**.

TECHNICAL SKILLS

Languages: C#, C/C++, Go, Python, JavaScript, SQL, Rust

Backend & Systems: .NET 9, RESTful APIs, gRPC, PostgreSQL, Redis, Windows, System Design

Cloud & Infrastructure: Microsoft Azure (VM), AWS, EKS, Kubernetes, Docker, Terraform, IAM, Git/GitHub, CI/CD

Security & Reliability: OAuth, JWT, RBAC, IAM, Authentication, Authorization, Observability, Prometheus, Grafana

ACHIEVEMENTS

- Ranked **365th** among **15,804** participants in CodeChef **START192D**.
- Ranked **3,026th** among **17,000+** participants in Codeforces Round 1110 (Div. 1 + Div. 2).

LEADERSHIP & ACTIVITIES

- Organized an intra-college hackathon and mentored **25+ teams** as a **Technical Committee Core Member**.
- Led recruitment, mentorship, and event initiatives for **100+ students** as **Joint Secretary of DOT Club**.
