EDUCATION

B.Tech in Information Technology

August 2023 - May 2027

IIIT Vadodara, Gujarat, India

Coursework: Data Structures & Algorithms, Operating Systems, Object-Oriented Design, Backend Systems

EXPERIENCE

Aarogya Kaya | Remote | Software Engineer Intern

July 2025 - January 2026

- **Architected backend services** using CQRS, PostgreSQL, and Supabase RPCs, securing **15 RPC functions and database tables** with **JWT/RBAC, Row-Level Security, admin-only controls, environment secrets, and least-privilege access**.
- Optimized **backend read paths** with in-memory caching, Redis, and database access patterns, reducing average latency from **420ms to 38ms** while maintaining **p95 latency below 250ms**.
- Engineered **fault-tolerant asynchronous pipelines** with retries and idempotent processing for a production service serving **1,000+ users daily**, maintaining **99.9% data consistency**.
- Built **CI/CD pipelines** for backend and web services, automating **unit tests, Playwright E2E tests, linting, build validation, and deployment** across pull requests and merges.

Open Source | Remote | Software Contributor

July 2025 - May 2026

- Migrated the **Next.js (Vercel) patch-next utility** from CommonJS to TypeScript ESM, saving **15–30 seconds** per local reinstall during development and testing.
- Contributed **22 merged pull requests and 12 issues** through maintainer reviews, design discussions, and iterative feedback, fixing bugs, implementing features, and improving developer tooling.

PROJECTS

A3.store – Distributed Key-Value Database | Python, Azure AKS, AWS EKS, Kubernetes, Terraform, gRPC

[Live](#) | [Github](#)

- Developed a **leaderless distributed key-value database** with **gRPC replication, quorum consistency, gossip-based failure detection, hinted handoff, and anti-entropy repair** across a **3-node cluster**.
- **Managed capacity allocation, placement, and workload lifecycle across Azure AKS and AWS EKS** with Terraform/Kubernetes, running **3 stateful KV replicas across autoscaling 1–3 node pools** using pod anti-affinity, persistent volumes, rolling updates, PDBs, and health probes.
- Instrumented **10 Prometheus metrics** with **Grafana** and ServiceMonitor-based **15s telemetry scraping** across service health, request traffic, replication, storage, and background processes for production troubleshooting.

Cloudx.syn – Windows Cloud File Sync Client | C, .NET 9, Azure SQL, Azure Blob Storage

[Github](#)

- Built a **C#/.NET 9 cloud-sync system** integrating **Azure Blob Storage and Azure SQL Database**, processing create, modify, rename, and delete events through asynchronous queue-based synchronization.
- Designed the **Azure SQL metadata layer** with relational constraints, indexes, transactions, and parameterized queries, profiling workloads with **Query Store** to optimize database performance.
- Instrumented sync, storage, and database operations with **Azure Monitor/Application Insights and OpenTelemetry**, tracking request latency, failures, retries, and service health for production troubleshooting.

TECHNICAL SKILLS

Languages: C#, C/C++, Go, Python, JavaScript, SQL, Rust

Backend & Systems: .NET 9, REST APIs, gRPC, PostgreSQL, Redis, Distributed Systems, System Design

Cloud & Infrastructure: Microsoft Azure, AKS, Azure Blob Storage, AWS, EKS, Kubernetes, Docker, Terraform, CI/CD

Reliability & Observability: Prometheus, Grafana, Telemetry, Logging, Fault Tolerance, Pytest, Playwright

ACHIEVEMENTS

- Ranked **365th** among **15,804** participants in CodeChef **START192D**.
- Ranked **3,026th** among **17,000+** participants in Codeforces Round 1110 (Div. 1 + Div. 2).

LEADERSHIP & ACTIVITIES

- Organized an intra-college hackathon and mentored **25+ teams** as a **Technical Committee Core Member**.
- Led recruitment, mentorship, and event initiatives for **100+ students** as **Joint Secretary of DOT Club**.
